

SAJID SARWAR

Senior IT Infrastructure Manager | Cloud, Datacenter, Service Delivery & Resilience

Infrastructure strategy | technical leadership | projects | vendors | operations

+965 67783063 | sajj4u@yahoo.com | Kuwait | Open to GCC and worldwide relocation

Professional Profile

Senior IT infrastructure and service-delivery professional with 20+ years across regulated oil and gas, government, healthcare, retail and service-provider environments. Combines technical leadership, architecture, vendor coordination and operational ownership across Azure, Microsoft 365, datacenters, virtualization, networks, storage, enterprise backup and disaster recovery. Proven delivery includes a 45-day Azure migration for a head office and 98 live branches, datacenter builds and resilient data-protection architecture.

Core Competencies

- Infrastructure strategy, service ownership, roadmaps, standards, risk and operational handover.
- Technical leadership across cross-functional teams, suppliers, vendors, incidents, changes and stakeholder reporting.
- Azure and hybrid-cloud infrastructure, Microsoft 365, datacenter modernization, VMware, Hyper-V, Windows/Linux and storage.
- Business continuity, backup, disaster recovery, immutable retention, restore validation and RTO/RPO planning.
- PMP and ITIL-based delivery, procurement support, capacity planning, documentation and continuous improvement.

Role-Specific Value

- Suitable for IT Infrastructure Manager, ICT Manager, Infrastructure Lead, IT Operations Manager, Service Delivery Manager and Data Center Manager roles.
- Leadership wording is evidence-based and avoids unsupported claims about direct reports or budget ownership.

Professional Experience

Backup Administrator / Technical Infrastructure Consultant | *KGOC IT Operations, Kuwait Gulf Oil Company* | Jul 2025 – Present

- Lead enterprise infrastructure, backup, disaster-recovery and modernization activities across on-premises, Azure and hybrid-cloud environments.
- Administer and coordinate Veritas NetBackup 10.5, Cohesity DataProtect, MSDP/deduplication storage, Dell ML3 LTO-9 tape operations, cloud tiers and replication.
- Support VMware, Hyper-V, Windows/Linux, Microsoft SQL, file services and Microsoft 365 protection; perform restore validation, DR testing and RTO/RPO planning.
- Prepare architecture notes, implementation plans, SOPs, capacity reports, topology documentation and vendor cases; troubleshoot production incidents to root cause.

Virtual Infrastructure Administrator | *Enhance Engineering & Multi-Technologies Co. – Kuwait* | Aug 2022 – Jun 2025

- Managed VMware vSphere, ESXi, vCenter, HA clusters, storage provisioning, LUNs, capacity, performance, backup integration and operational documentation.
- Supported Windows/Linux infrastructure, availability, incidents, changes, network connectivity and service handover.

IT Senior Systems Administrator / IT Function Lead | *Arabiya Modern Clinic, Kuwait* | Jun 2021 – Jul 2022

- Owned servers, virtualization, networks, security, storage, backup, telephony, vendors and business-critical systems; delivered a greenfield datacenter implementation.

IT Systems Administrator | *Diyar United Company – Ministry of Awqaf and Islamic Affairs, Kuwait* | Nov 2013 – Jun 2021

- Administered Microsoft and VMware environments, Active Directory, SCCM, SQL support, high availability, backup operations and user-facing infrastructure services.

Selected Verified Achievements

- Led a 45-day Azure migration for a head office and 98 live branches while maintaining business continuity.
- Supported two datacenter builds and hybrid-cloud modernization work covering architecture, sizing, connectivity, security coordination and handover.
- Delivered enterprise data-protection improvements using NetBackup 10.5, Cohesity, MSDP, cloud retention, tape operations, replication and restore validation.
- Produced implementation plans, technical recommendations, SOPs, RCA evidence, capacity reports and vendor coordination updates for complex infrastructure changes.

Technology Platforms

Azure IaaS, Azure Backup, Site Recovery, Monitor, Entra ID, Microsoft 365, Windows Server, Linux, Active Directory, VMware vSphere/ESXi/vCenter, Hyper-V, Veritas NetBackup 10.5, Cohesity DataProtect, Veeam, Dell EMC, HPE, Data Domain, SAN/NAS, Fibre Channel, Cisco networking, Fortinet coordination, Microsoft SQL and PowerShell.

Certifications & Education

Microsoft Certified Azure Solutions Architect Expert | Microsoft 365 Enterprise Administrator Expert | Azure Administrator | Azure Security Engineer | CCNP Enterprise | PMP | ITIL Foundation V4/V3 | VMware / EMC Technologies | CompTIA Server+ / A+ | MCITP / MCSA / MCSE

Bachelor of Computer Science (Hons) – University of the Punjab, Lahore, Pakistan
